Brause

History

Brause has been manufacturing steel nibs in Iserlohn, Germany since 1895. Founded in 1850 as a needle maker, the company expanded five years later to include pen nibs produced from cold, rolled steel. Today, Brause nibs are considered the finest available and are beloved by professional calligraphers, lettering artists, and illustrators.

Steel Nib Manufacturing

Brause manufactures steel nibs for writing, drawing, and calligraphy. The quality of craftsmanship is renowned by calligraphers worldwide. Offering a subtle balance between relative elasticity for easier writing and the resistance necessary for clear strokes, Brause nibs are manufactured from cold rolled steel and pressed with tools specific to each model and size. The most delicate part of the manufacturing process involves cutting a slit down the middle of the nib, enabling the ink to flow correctly and freely from the reservoir to the tip of the nib.

Calligraphy Nibs

The finest German craftsmanship since 1850
