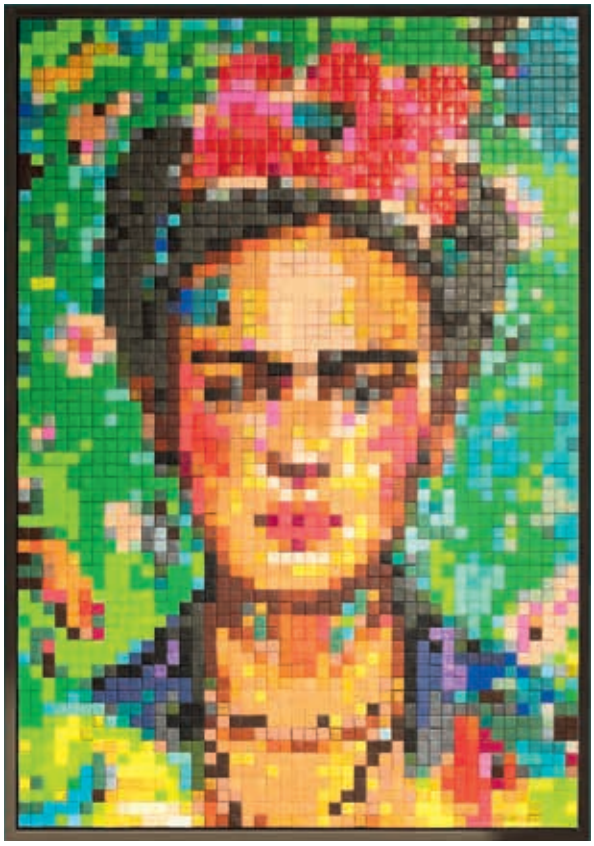
CERNIT® / PREMIUM POLYMER CLAY NEW

Beloved by artists, Cernit polymer clay can be used to sculpt figurines, jewelry, decorative objects, and more with incredible precision. Its smooth, pliable texture allows for endless creative possibilities. After sculpting, bake at 265°F for 30 minutes to transform the clay into permanent, but still flexible, objects.

- Nontoxic and odorless
- Easy to soften and shape
- Mixable colors for custom shades
- Remains flexible after baking
- Water resistant after baking
- Made in Belgium

IMPORTANT

Cernit Polymer Clay is temperature-sensitive so to maintain the quality, please store it between 40–80°F. Shipments may be delayed during extreme weather conditions to protect your order.



Step 1: Mix

Step 2: Flatten

Step 3: Shape

Step 4: Finalize

Step 5: Bake

Step 6: Enjoy

NUMBER ONE NEW

THE MUST-HAVE RANGE

With over 30 vibrant colors, Cernit Number One polymer clay offers endless creative possibilities. Stunning, seamless gradients and consistent, opaque results can be achieved with high-quality colors that blend effortlessly with other Cernit clays. After baking, projects can be finished with a matte surface or polished to a high-gloss shine—no varnish required.

OPALINE NEW

FOR REALISTIC TEXTURE AND LIFELIKE CREATIONS

Cernit Opaline clays add texture and depth to any creation, with a semi-opaque, semi-translucent finish after baking. The 14 dazzling shades also deepen and intensify after baking, revealing their true vibrancy. Perfect for miniaturists, food reproduction, and any project where lifelike detail is key.

PEARL NEW

SPARKLE AND SHINE

Infused with shimmering mica particles, Cernit Pearl adds a dazzling touch to any project. After baking, the iridescent finish and visible glitter create a mesmerizing effect that will make creations shine. Featuring larger mica flakes than the Metallic range, Cernit Pearl delivers a truly beguiling sparkle.
