

## Pastelmat - 360g

The trusted medium for the pastel market.

The pastel adheres so well to this new paper that you don't need to use a fixative between each layer. You are able to multiply the layers without a saturation effect. Pastelmat brings new opportunities for pastel artists, offering a coarser surface than velour but a softer surface than sand paper.

- Organic Velvety Surface: strong, velvety surface that has more tooth than traditional Ingres papers but without the abrasive qualities of sanded papers
- Vibrant Color: surface grabs onto the pastel, breaking up the pigment and pulls it deep into the surface for exceptionally vibrant color
- Painting with Pastel: surface has unique interaction with pastels, allowing the artist to create painterly effects with soft, buttery marks.
- Blending: remarkable control, allowing for effortless, precision blending of pigments.
- Layering: Supports building up multiple layers of pigment to control color tone and intensity.
- Washes: Holds up to water or solvent-based washes.
- No need for fixatives: surface pulls and holds pigment so deeply, fixatives are not needed to keep the color stable.
- Mixed Media Surface: in addition to pastel and pastel pencils, it will support most dry and wet media including: oil pastels, charcoal, colored pencils, acrylics, watercolors and gouache.
- Supports All Pastel Types: supports the application of soft, medium and hard pastels, Cray-Pas® and other oil pastels, PanPastel® colors as well as pastel pencils.
- Acid free, pH neutral
- In the pads, each sheet is protected by a crystal paper divider.
